

Issues spatial planning

1. Sustainability: land-use planning – environmental planning (maybe Lucca)
2. Diverse Social Structures – management issues, stakeholders and balance – Den Bosch
3. Unique and special characteristics - Piran
4. Intermediate areas – conflict areas, transitional areas -Arabbarri
5. Walled cities and regional interventions - Chester
6. Purpose of the city? Monument or active city – living community? (Initially Chester)

3.1.1 Pre diagnosis (Purpose of space has changed)

- 1 What are the issues
- 2 Determine what is wrong
- 3 Describe the physical issues

3.1.2.2 Environment and landscape

(no change)

3.1.2.3. Historical evolution

- 1 How has these spaces been used over the historic time period

3.1.2.4 Human Environment

- 1 Social point of view

3.1.2.5 Economy

- 2 Economic value

3.1.2.6 Transport Infrastructures

- 3 Physical links with the city and regional communication network

3.1.2.7 Functions and Services

- 4 Take out transport and place bracket around communications

3.1.2.8 Cultural Heritage

(no change)

3.2 Reflection (is the analyses)

3.2.1 Evaluation/summary

- 5 Take out What do we demand to it
- 6 What do we want it to be?
- 7 Why do we want it to be like and why?

3.2.2. Programming (establishing the strategies)

3.2.2.1 Proposal for regional structure

3.2.2.2 Regulating model

3.2.2.3 Regional elements (strategy)

3.3. Implementation

3.3.1 Proposals to deliver the above strategy

3.3.2 Management (includes funding)

3.3.3. Execution and action

3.3.4 Participation

Where we can we will apply this model to the other themes

Arabarri co-ordinates to check all the themes with the above method of writing (assembling) of the Good Practice Guide
